WVSTC 2017 – QR Code Game

Our QR Code game provides you with an opportunity to win prizes while meeting our vendors. Each vendor has a QR Code printed on a sheet of paper. Using a QR scanning program on your mobile device, scan as many different codes as possible. Attendees who scan the most codes are eligible for prizes.

On your mobile device, go to http://wvstc.com/mobile . In the menu, select "QR Code Game". Enter a name and email address to identify yourself – these are required if you want your scans to be counted towards winning a prize. They are only used for this game and will be discarded afterwards.

To participate in the game you will need an app on your mobile device that can scan QR codes. Search the Apple App Store or Google Play for "QR code scanner". After you install and launch the scanning app you can scan QR codes and it will keep track of your progress.

The first time you scan a QR code you may be asked for a name and email address. If so, enter the same name/email that you used for the app. Each time you scan a QR Code you will see a message confirming the scan.

To check on your progress, go to http://wvstc.com/mobile and click on "QR Code Game" in the menu. This will show you how many QR codes you have scanned, and which vendors they came from. Hint: There are around 80 possible codes to scan!

We will announce the winners of the QR Code Game during the Exhibitor Reception on Wednesday July 19 at 2:10 PM in MEC Exhibit Hall A & B. You must be present to win. Happy Scanning!!!
